

Time Cards

Cut out order these time cards. Some will need to be converted before you compare them – a million seconds for example. Others can be argued to be different lengths, so make sure that you have an actual number in mind when you decide what order to put them in! Email your finished list / explanation to your teacher via the website.

A minute	The time needed to soft boil an egg	A million seconds
A year	Number of years since the Victorians were around	The number of years since the Romans came to Britain
Time for an oak tree to get to 30m high	Time for the earth to go round the sun	The time the shutter is open on a camera when you take a photo in daylight.
Time for light to come from the moon	A hundred months	Length of time since the last ice age.
Number of months since you were born	An hour	A thousand days
A month	A fortnight	Number of years since your granny was born
A day	Time from sowing tomato seed to eating the first tomato.	Length of time to have a good shower
The time for a game of football without any extra time	Time needed for you to read all the Harry Potter books	Time for the moon to go once round the earth
Time to tidy your bedroom	The time for the TV signal to come from the TV cable to your TV set	The total amount of time in a year spent in my maths lessons.
